

Effects of NRCS Conservation Practices - National

Land Reclamation, Landslide Treatment

Managing in-place natural materials, mine spoil (excavated over-burden), mine waste or overburden to reduce down-slope movement.

Code: 453

Units: no.

<u>Soil Erosion</u>	<u>Effect</u>	<u>Rationale</u>
Soil Erosion - Sheet and Rill Erosion	2	The establishment of vigorous vegetative cover will reduce erosion from water.
Soil Erosion - Wind Erosion	2	The establishment of vigorous vegetative cover will reduce erosion from wind.
Soil Erosion - Ephemeral Gully Erosion	2	The establishment of vigorous vegetative cover will reduce erosion from water.
Soil Erosion - Classic Gully Erosion	0	Not Applicable
Soil Erosion - Streambank, Shoreline, Water Conveyance C	0	Not Applicable
<u>Soil Quality Degradation</u>		
Organic Matter Depletion	2	Site modifications including vegetation establishment increases on-site organic matter.
Compaction	0	Site modifications may include revegetation or other features that impact compaction.
Subsidence	0	Not Applicable
Concentration of Salts or Other Chemicals	0	In some cases the loose talus may contain salts or other material that must be removed to re-establish vegetation.
<u>Excess Water</u>		
Excess Water - Seeps	2	Removal of water to stabilize slopes reduces seepage.
Excess Water - Runoff, Flooding, or Ponding	0	Not Applicable
Excess Water - Seasonal High Water Table	2	Removal of water to stabilize slopes reduces seepage.
Excess Water - Drifted Snow	0	Not Applicable
<u>Insufficient Water</u>		
Insufficient Water - Inefficient Use of Irrigation Water	0	Not Applicable
Insufficient Water - Inefficient Moisture Management	0	Not Applicable
<u>Water Quality Degradation</u>		
Pesticides in Surface Water	0	Not Applicable
Pesticides in Groundwater	0	Not Applicable
Nutrients in Surface water	0	Not Applicable
Nutrients in Groundwater	0	Not Applicable
Salts in Surface Water	0	Not Applicable
Salts in Groundwater	0	Not Applicable
Excess Pathogens and Chemicals from Manure, Bio-solic	1	Because of increased cover and reduced infiltration
Excess Pathogens and Chemicals from Manure, Bio-solic	0	Not Applicable

Excessive Sediment in Surface Water	4	Erosion control and increased cover will reduce runoff and sediment.														
Elevated Water Temperature	0	Not Applicable														
Petroleum, Heavy Metals and Other Pollutants Transport	4	Increased vegetation increases infiltration and reduces runoff and erosion.														
Petroleum, Heavy Metals and Other Pollutants Transport	0	Not Applicable														
<u>Air Quality Impacts</u>																
Emissions of Particulate Matter (PM) and PM Precursors	0	Not Applicable														
Emissions of Ozone Precursors	0	Not Applicable														
Emissions of Greenhouse Gases (GHGs)	0	If used, vegetation removes CO2 from the air and stores it in the form of carbon in the plants and soil.														
Objectionable Odors	0	Not Applicable														
<u>Degraded Plant Condition</u>																
Undesirable Plant Productivity and Health	4	Vegetative cover species will be selected and maintained at optimal conditions for the intended purpose.														
Inadequate Structure and Composition	5	When species are selected for stabilization, they are adapted and suited.														
Excessive Plant Pest Pressure	4	Vegetation is installed and managed to control undesired species.														
Wildfire Hazard, Excessive Biomass Accumulation	0	Not Applicable														
<u>Fish and Wildlife - Inadequate Habitat</u>																
Inadequate Habitat - Food	2	Increased quality and quantity of vegetation provides more food for wildlife.														
Inadequate Habitat - Cover/Shelter	2	Increased quality and quantity of vegetation provides more food for wildlife.														
Inadequate Habitat - Water	2	Not Applicable														
Inadequate Habitat - Habitat Continuity (Space)	0	Not Applicable														
<u>Livestock Production Limitation</u>																
Inadequate Feed and Forage	0	Not Applicable														
Inadequate Shelter	0	Not Applicable														
Inadequate Water	0	Not Applicable														
<u>Inefficient Energy Use</u>																
Equipment and Facilities	0	Not Applicable														
Farming/Ranching Practices and Field Operations	0	Not Applicable
